APM Case Study Solution

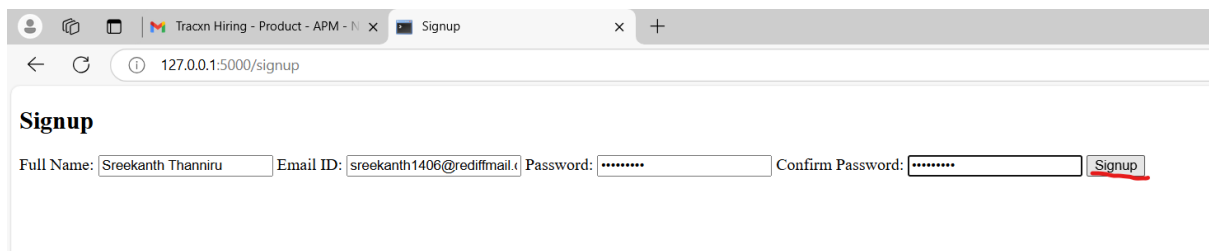

Design careers page form for applicant

Sample for: user registration

■ User will get into signup page & fill's required fields

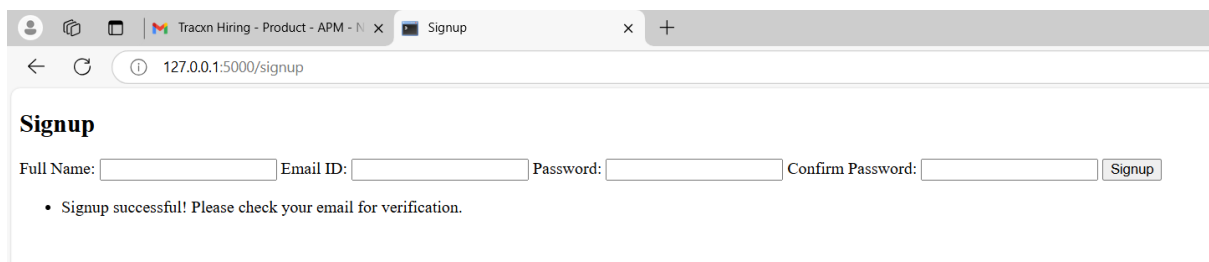

A browser window showing the 'Signup' page at 127.0.0.1:5000/signup. The page has a title 'Signup' and four input fields: 'Full Name:', 'Email ID:', 'Password:', and 'Confirm Password:'. A 'Signup' button is located to the right of the 'Confirm Password' field. All fields are currently empty.

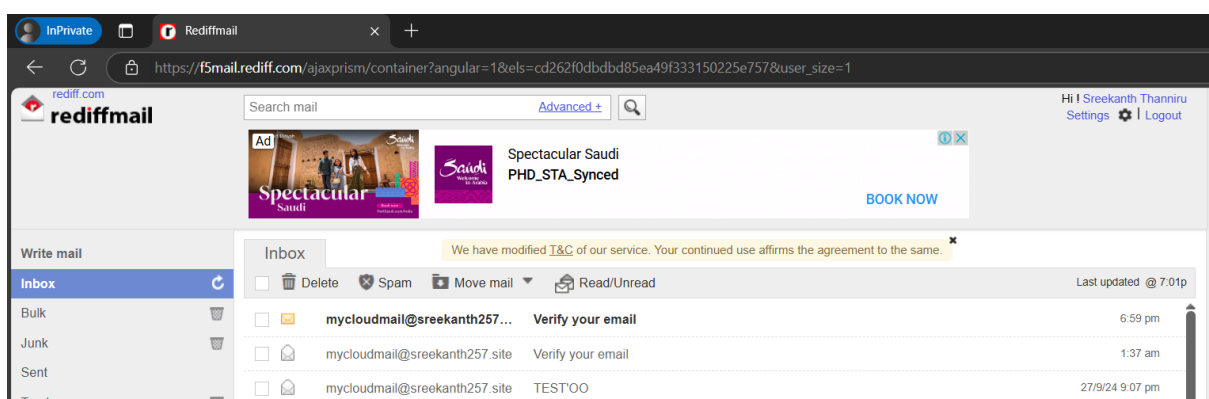

The same 'Signup' page, but now the form fields are filled. 'Full Name' is 'Sreekanth Thanniru', 'Email ID' is 'sreekanth1406@rediffmail.c', 'Password' is masked with '*****', and 'Confirm Password' is also masked with '*****'. The 'Signup' button is highlighted with a red underline.

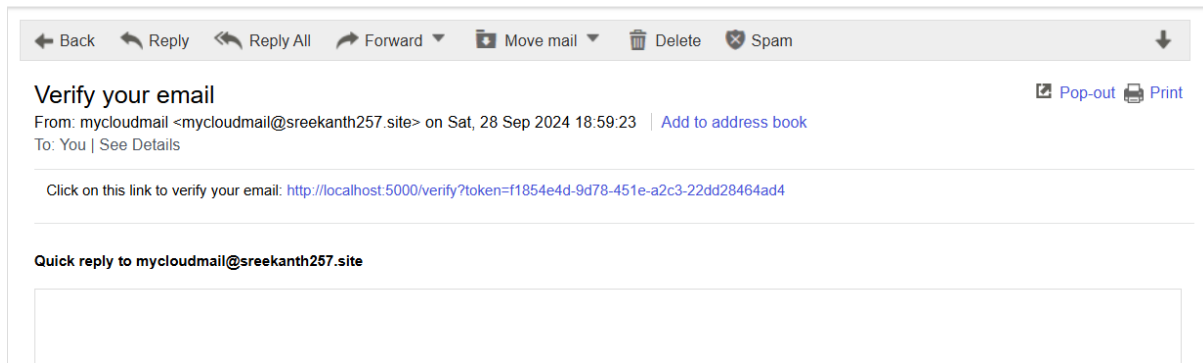

■ To the registered email ID verification token will be sent

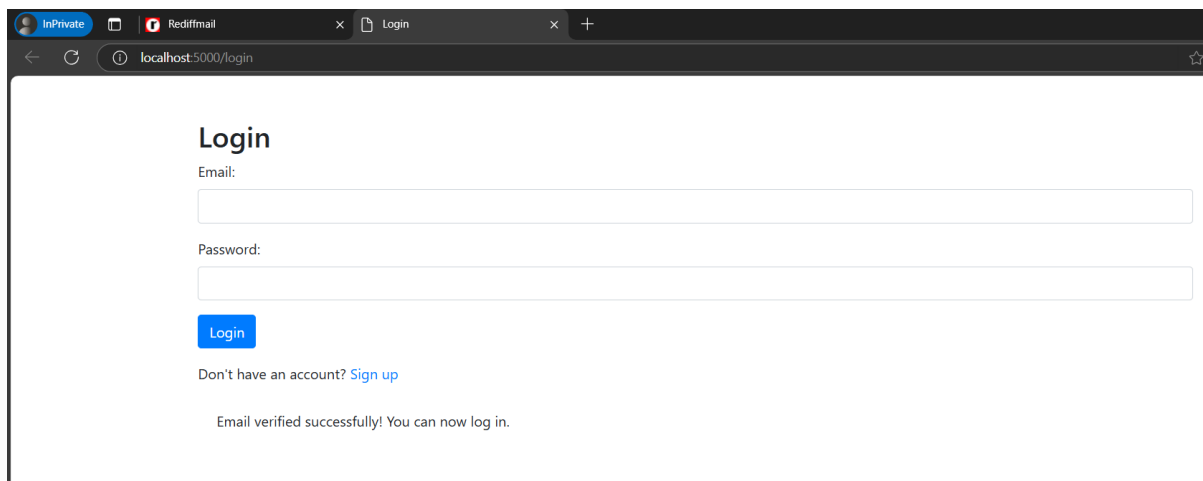

The 'Signup' page after successful registration. Below the form fields, a message is displayed: '• Signup successful! Please check your email for verification.' The 'Signup' button is still present.

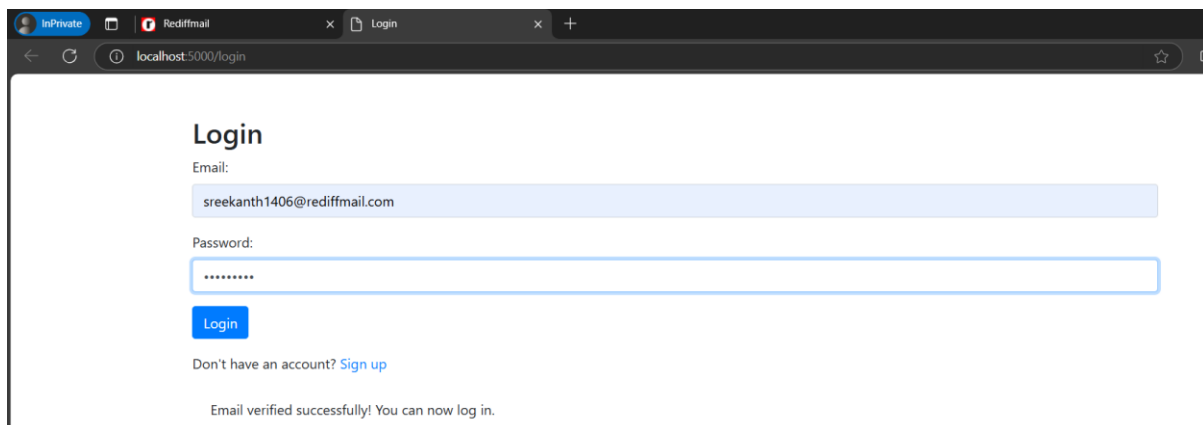

- Click on the link to activate/verify user (**without verification user cannot login into dashboard**)

- After clicking link user gets verified, he can now able to login

- Given the correct the correct credentials to login

- After logging in this is the dashboard view
